ny, March 1, 1986.

A good propoction of the Northern people, who are not all injurned by being too loyal, have sizes the first issue of our Nettonal excress, continued to represent it, as of little value, and have said that, little termination of the war become unterly worthern So strongly did the ensemies of the present administration uses the continued to represent administration uses the description of the war become unterly worthern to strongly did the ensemies of the present administration uses the description of the war become unterly worthern to the National bonds. It has therefore, required an effort on part of those engaged in the said of bonds to raise money, when if the proper feeling had prevailed our government should at all times have had more offers than it could have engaged and mouse concept to meet all demands and to spare. It is attrangulated, that among our own people such distrust should exist, when foreigners, when the sum of the

semonous absoribed by the Commercial Bank Tennessee.

Other sources also bring similiar reports abowing the great confidence in which the government is held even by those who have the least opportunity of knowing the Government is the indebtedness of its ability to pay. The loyal people of the North Anne always had unbounded confidence in the government, and never even hesitated in making investments, or taking the national currency for any marketable commodity they had to sell. The national currency is now laid up with as much confidence in its permanent value as formerly gold was. The effort to depreciate the credit of the government has failed, as has all other efforts to work end to the confidence in the growth of the continuation false, by choosing the National in preference to local issue. It has been the policy of the Democratic party to destroy, it brought on this was by fostering the institution of Slavery, and encouraging the doctrine of Secession: Is both are foolaly sustained and upheld by this party, and the war, we are now engaged in its, but the legitimate growth of these circumons doctrines. In leaders find that Slavery is doomed and secression fast reaching its grave. Nothing is left to this party but to paralize the arm of the government by readering disreputable, if possible, the means it employed to purge the body politic of these dangerous evils. But it's efforts in this are proving abortive. The body people will invest in the bonds, and foreign governments will consider them good. The Xational credit will continue. The war will go over, and the political framment will grow bright. This is the result of the invalication of correct principles, a discrepent for human rights and common justice, and this alone is that which security to the government tespet abroad and prosperity at home. This in the end will give us peare and conciliation—a peare founded on harmonions co-operation, mutual benefit

An interesting letter from the chief Editor written at Arlington House, Ya., the late residence of Gen. R. E. Lee, was received too late for this week's paper. It will appear in our next.
