### FROM CEN. LEE'S ARRY.

There being no afficial news from Gen Lee's army, is is very difficult, among the multiplicity and contrariety of rumors to accertain the truth as to what has been to ascertain the truth as to what has been done. Ever since the advance of Gen Lock army, there has been daily heavy awaity switching, in which our cavalry have noight with marked gallantry, and have a conglet of manufacturing a large number of prisoners, probably between 1,000 and 2,000. News from down the Vallay, which reached here on Sinday, records that share has been a gaugeral aports that there has been a general agagement in which we defeated the many. Though this news has not been to this

morning] we cherish the hope that it is true.

Latex: —Passengers by the train of last evening report that Gen?! Lee, having driven the caseny within his one trenchment at Castreville, is now coming back. The game has been driven to his burrow, and the hinters have recalled the "dogs of war."

About fifty of those who were wounded in the late fights were brought to this place in the train of last evening.

THOSE CHARLESTON.

There is no news from Charleston farther than that the enamy are still actively engaged at work planting batteries in the swamps on Morris Island with the view of throwing shells into that city. On the 16th inst, fem. Beautregard, accompanied by Gen. Pierre Soule and staff, ratifished the troops of Gen. Taliaferro's division on James Island this morning. The display was magnificent, morning. ### FROM CHATTANOOGA.

There is no news of special interest from Chatlanoga. Both parties have large arraks there—both are propared to be attacked, but ueither prepared to attack the other, as both occupy remarkably strong positions. Gen. Wheeler, with his gallant cavalry, have been wheeling around in the rear of the enemy canturing a breast number of success. wheeling sround in the rear of the energy capturing a large number of wagons and destroying the enemy's communications. It is thought that, for want of supplies, owing to bad roads, the enemy will be compelled to attack us or at tempt to evacuate. It is believed that Gen. Bragg will be superseded in command by Gen. Johnston or Gen. Longstreet.

GEN. AVERILL REPORTED COMING. News has reached this place by a letter from a rendeman in Highland that Gen. Averill, with a force of six thousand, was, a few days since, at Chest Momnain this side of Beverly, and con-Momean this side of Beverly, and con-templated a raid hoot this place. If he knew the kiad of reception he would meet with lears he would be as fearful of coming here as of trying again to reach Lewisburg by the way of the White Sulphur Springs. Our people, with their thimbs upon their neses and their fingers sprively twirling, are say-ing to Gen. Averill: "If you are com-sess, why den't you come along?"

EMPTY SLEEVES.

The Lynchburg Republican aptly remarks that we frequently see passing along our streets, silent mementoes of heroism. They are empty sleeves dangling by the sides of war-worn privates. We never look upon the possessor of one of these empty sleeves, but to our mind's eye a rises the sight of a venerated mother sea and spectacles on nose, stopping to wipe away a tear at the thought of her darling and speciacies on nose, stopping to wipe away a tear at the thought of her darling boy with one arm. And the poor fellows hobbling glong on crutches with only one leg spared to thom-they are objects of tender sympathy to the whole people. Doubt it not, ye soldiers, who probably miss the sympathies of home. All bolds Gen. Echols, at Lewiburg, Greenbrier county, issued an order granting permission to all persons, not liable to minitary duty, who wished to go into the lines of the enemy, to do so under a flag of truce on the 10th inst, whereupon as bout three handred Irish, including men, women and chi'dren, in all sorts of vehicles usseed through Lewishurg on the miss the sympathies of horre. All look upon you as heroes. women and chi'dren, in all sorts of ve-hicles, passed through Lewisburg on the day designated on their way to Yankee-dom. It is due to the Irish to say that they mistook the order to be imperative instead of permissive, and thought they had to choose between the alternatives of going into the military service or in-to the lines of the enemy, and chose the less dangerous alternative.

THE MONSTER GUNS AT CHAPLESTON.

The Augusta Chronicle understands that the second monster gun in Charleston has been tried lately under the direction of a beard of officers with entire seconds the control of the con success, throwing its huge projectile over two miles at an elevation of only two degrees, the gun being not yet reac fire at a higher angle. This is far fire at a higher angle. This is far be youd anything ever done by artiller be fore. These immense ritle guns are constructed on a new principle which permits enormous charges of powder to be used safely, and thus imparts the required momentum to the ponderous shells and solid bolts.

The injury sustained by the first gun was an oversight, and it is understood from good authority can be effectually repaired. The powder to be used with

\$50 per acre, making the whole value
\$40,000, was sold for the insignificant
sum of \$200. We do not know how
the selates of the other gentlemen sold,
but suppose in about the same proportion of value. The powder to boused with these guns is now being manufactured at the Government Powder Works, and at the Government Frowler Works, and is quite a curiosity, looking like anything else than gunpowder; the grains—if they can be so call d—being solid blocks looking like ebony, one inch square; it would be supposed that they were projectives themselves by their appearance, each grain weighing about one ounce.
