CHEATING BY BULE.

The desperation of the defeated bemo-crates in this Congressional and Jackied district fifty emblems their hostility to have and order, and shows with what tenerity they shing to the spoils of office. After tailing in their studied effort to dishan-chies our gallant soldiers, they not re-solved to doly the law and defanal them one of their votes; and to that end the bemo-matic nature judges have been ma-iphalyed by cardy and teckless point-craired and diven to open, insolent disce-gard of the laws they were swent to ex-tent.

citive and driven to opth, insufed driven gard of the law they were worn to verecent.

The plain English of the complications in our congressional and judicial districts is that the Democratic candidates for Judge and Congress were defeated at the polls by the army vote; and not redshing defeat they, or their friends, resulted that they wouldn't be defeated if enough of votes only the crowded out to elect them. Just how they were to be crowded out; they did not seem much to care, only so that apparent majorities should come to their side. To this end Mr. O. N. Shammon, Prothomotray of Bolford county-offs same who withdrew his subscription to the soldier hounty fund took the lead and manifested his appreciation of his solemn such of office, and his respect for the interior, so if a court in a confested election, and rightered such as suited him because he had no right-not even the shadow of a right to refer any; and all his proceedings were extra-judicial to use a charitable phrase, and villianous and frandulent to apply the houset Saxon. His duties as Prothomotary, bonching election returns are thus clearly defined by the lay:

A Sacon. His duties as Problomatary, which per layer the layer the probability decision returns are thus clearly lines by the layer the county, is when next return shadles go of the county, is when next return shadles for laterate the return being of the county of the county of the county of the layer of the clean can shadles and and and the layer of the clean can shadles and the layer of the clean can shadles and the layer of the clean can be considered as a clean specific of the layer of the clean can be considered as a layer of the layer of the clean can be considered as a layer of the layer of the layer in pulges? And lest some fool or scoundrel shoul not understand the law, or pretend not it.
