The condition of the military affairs of ane consumon of the military affairs of the country are not as flattering at the present time, as the hopes of the people led then to expect. The army of Vir-ginia has fallen back from the line of the Ramahamnek to some rount we hardle Lappahannock to some point we hardly now where. We have seconnes of two successful rebel raids in the rear of Poer's army, within a week, and also a rumor that the rebels are at Manasses in force which however we discredit. It is and conflicting reports that reach us, to arrive at anything like a correct under-standing of the real condition of things.

One thing, hovever, is certain, our arms have met with some serious reverses of late, and we are apparently no nearer the we say apparently, for we still and believe that with the new levies pouring into the field, that the are end of this struggle than we were a year powering into the field, that the cam-ity may be so managed by those in au-city, as to turn the tide of rictory in fivor, the war be brought to a market pouring into the field, that the camour favor, the war be brought to a sperdy termination and the national authority tal liebed over every foot of territory belonging to the nation.

Among the mistakes that have been made in the past, the first and greatest in r opinion, was under estimating the rength and resources of the South. Our rulers seemed to have had no adequate conception of the task before the people also were carried away by the same delusion, and permitted themselves fanaticism on the subject. was to be crushed out in a few weeks of iths at most. It was to be a mere akfast-task some told us, and he who dared to differ from these absord notions. was put down as a "sympathizer with treason." We have all since been convinced of the fatal error by and experi-

one of the other, was made in not cal-one a sufficient force at once to crush the rebellion, and restore the national authority. We solemnly believe that with 290,000 additional men in the field after one brilliant mecesses in the Southwest, when Gen. McClellan first advanced into Virginia, the war would be substantially ended to-day, and the authority of government under a process of encel resteration in all the States, The rebellion was tottering to its fall, and w struck in Virginia as 200,000 additional men could have atrack, would have suded its life at once

But unfortunately for the country, Cones sontrolled in a great measure by on sense and lacking in everything to constitute practical states. These men had other ends to than the saving of the cour They had a party programme to out. Slavery had to be abolished District of Columbia and the Teror at the elevery question. With all dur-reports the the Praciblest, and full conf-duces in the housest of his instantane, we think he made a notice blundard he bring-ing forward his "evanniquestion policy" at that particular time. It has not resulted in anything practical, and it is apparent ou at that it mover will. What we want and then was what we want how, a more od theo was what we want how, a niner proposed of the highest house into the wast by theory rose of the highest hanties m which ing an overwhelming force into the field of the President, nation, of anning his the parties of children two years of age, thinten demograpies into Congress sabing for the purpose of casting reproach on the Border States tellibrate their alanes, their parents had issued a proclamation calling into the several bundred thousand new care the results might have proved of infinite mportance, and the country would sot ic in the condition we find it to-day. Hut we do not wish to grieve over the

ast as needlessly deplote that which annot now be remedied. We simply all ude to the facts with the hope, that simday errors may be avoided in the future We want the whole power and resources of the loyal person of the country thrown into this struggle, in order to suppress this unboly, terrible and domaing rebellion at once. This must be done and that as speedunderly, retrieve on concerning the state of the reconstitution of we will have despoting as its legitimate and log cal sequence. Hence the necessity of log cal sequence putting an end to this war in the shortest possible time in which it can be done.

We also want that miserable tribe of wats in the present Congress turned out, and their places filled by men of seese-men who have the ability to comprehend the magnitude of the crisis through which sectional prejudices or partiran bigotry. We want no more trifling whilst the na-tion is trembling upon the brink of rain. In conclusion, we append the following appropriate remarks from that stand Union paper, the Louisville Democrat:

The late disgusting acts of theorems, proping come attor, emancipation, and the empty ment of negocial all resulted from come is weakpass. They were desperate, can chemical

e delusion, and permitted themselves cle we have received important and stir ring news from the sect of war in Virstein on the subject. This rebellion ginia. A series of battles have been fought during the last work. A severe engagement took place on Friday between tien. Papes forces and the rebel forces under Gen. Jackson, on the old Bull Run | Wi battle ground, between Centerville and Manages. After fighting from early in the morning nutil late in the evening, the rebels were driven back and Gen. Pope retained possession of the field during the night. The next day, Gen. Jackson being heavily re-inferced, renewed the contest, and after severe fighting, Gen. Pope was compelled to fall back to Centerville, which he did in good order. Since then the news has been vague and unsatisfaccolumns to gather such information as we have been able to give them.
