The number of horses lost in the above samed counties between the years 1850 and 1863 amount to 4, 259. The proportion of horses to the white population in the State is about 38 of the foreser to 100 of the latter. In thalyorine of the State under our control, we have lost, in the time specified above, 95, 201 horses.

In 1800, the number of cattle returned for taxation in the entire State was 1,741,132, or minely-seven for every one hundred white persons. In 1863, the number of cattle within the territory froe from the occupation and incursions of the public enemy was 507,152, to which not she propert, the usual difference between the actual and taxable numbers, and we have 547,724 cattle within our control in the last mentioned year, which is one hundred and fire head of cattle to every one lighted white inhabitants.

In view of these statistics, where can
a justifiable reason for the present very
high price of beef be found?

SHEEP AND HOUS.—Sheep and hogs
were not separately listed for taxation
till the year 1881. In 1881, the number of sheep was 489,331, and in 1883,
531,057, 8howing an larcease of 23,236.

In 1861, the number of hogs, in the
constitue and corporations ander our control, was 939,765, and in '83, was '782,
793, showing a loss of 156,970, or at the
rate of more than S 1-3 per cent. per
annum.

The statistics of 1965 show that our resources had not, at that time, buon materially diminished. We would keps, shough it is not reasonable to expect, that the exhibits for '64 and '65 will be equally encouraging.
