The November elections have respond ed nobly to their predecessors of October New York, New Jersey and Illinois have fallen into line with Pennsylvania, Obic and Indiana, and the six great central States—the very heart of the country declared in thunder topes for the have declared in thunder toose for the Constitution as it is and the Union as it was. The result of those elections pre-sent the first dawn of loops for a united country in the future. It is an aution well established, this terry effects incause, and to get rid of the effect you must re-more the cause. This principle applies with full force to the troubles existing in our country since the Presidential elec-tion of 1800.

Sectionalizing the country on two an agonistic ideas, both in direct conflict with the Constitution, was the greateness producing our present calamities. A few perbulent and ambitious men, regard-less of the peace of the country, and for the purpose of gaining political power for themselves, seized hold of a power for themselves, sends that is a powerful political party in the free States and by pandering to the prejudices of the masses who were ignorant of the designs their leaders, succeeded in arraying Northern States in an attitude of hos the hortern States in an attitude to move tility to the South. The Northern people have lately what Mr. Lincoln should have done at the beginning of his administration but refused to do.
