The resolutions adopted at Haltimore are, in their feebleness and as if Seward might have written and Raymond corrected them. GRANT AND MCCLELLAS.

About two or three weeks sets the War Department published a gram, purporting to have come from General Grant to the effect that he General Grant to the enert that ae intended to fight his way to Rich-mond on the plan saggested by the Administration, even if it took him "all summer." This bore a falsehood upon its face, but it was one of the small dodges resorted to by our Administration to demonstrate that the overland route to Richmond was the true one after all. But see the situa-tion of things now. Grant's legintrue one after all. But see the situa-tion of things agow. Grant's begin-ing of the siege of Richmond, as the Age truthfally remarks, is exactly like McClellan's was. His right flant approached Mechanicaville, and his left New Bridge, as McClellan's did His supplies are drawn from White House as McClellan's were. His bost officers as accidental were. His bost officers were McClellan's best officers. The Chickshominy is before him to be crossed, as it was before McClellan, He is surrounded with swamps, as McClellan was and will have to bridge term, as Necurity of the same immunication of the post of the same immunication of the same immu them, as McClellan did. We have to observe, in passing final review upon the action of the Convention, that it is the beginning of a large record for this translation of the Convention, that it is the beginning of a large record for the Tokason of the convention, that it is the beginning of a large record for the Tokason of the Convention, that it is the beginning of a large record for the Pomocracy, when it must be a Chisago, to make a platform of even higher, perse and subtle significance, and is the send all elements of the personal control of the convention charter of our Laws and Liberties.

GENERAL BUTLER has gained no little notoriety by the strictness with which he has held every one under his control to the precise letter of the military law, but he pays no sort of attention to it binaself. There is an army regulation expressly forbidding officers from communicating with newspapers to set themselves right with the public or to make known their military doings. But during the past month Butler has repeatedly written to the public journals over his own aignature, which is something no high officer with a proper sonse of self-respect would ever do. He has written respect would ever do. He has written W. H.
