From the Richmond Enquirer we learn that a very large meeting of the "friends of phace" was held at Dover last week, at which speeches a scouling party of our troops and a strong picket of the sener, posted bear Hunting Oreak, and within a short distance of Alarandria. The Dufsderate parties were, from the Governore Grand, five of the Cookland Oavalry and twenty Alabamians, besides three guides: thirty-three in all. By some reans they preserved themselves of the countersing of the onenry, and the succeeded in pessing two lines of sentiach, intending to get as from the tree description of their results and read the successing above an aposible and gather up all on their retwo lines of sentinels, intooding to get as far not deter the people of Deleware from expressing down as possible and gather or all on their return. They now came, however, upon a sixteng bury be instructed to vote for a recognition of plekst of about fifty men, who had become apprised of their approach, and fired upon them as they advanced, killing one of their number, Bergeant Henry Hainus, of the Governor's Guard.
